SSEKAJJA VICTORIA MIREMBE

Full Stack Software Developer

PERSONAL INFORMATION

Address: Kasangati, Gayaza, Uganda
Telephone: 0763 974 725, 0709001009.
Email: victoria.ssekajja@gmail.com
Portfolio: https://ssekajja-victoria-mirembe-eta-1237.vercel.app/
LinkedIn: https://www.linkedin.com/in/ssekajja-victoria-243216284/
GitHub: https://github.com/VictoriaMirembe
Nationality: Ugandan

PROFILE

Detail-oriented Software Engineer and Data Science professional with hands on experience building scalable full stack applications, integrating Large Language Models (LLMs) like Claude and OpenAI, and developing production grade AI tools for modern media and enterprise ecosystems. Proficient in React, Next.js, Node.js, and Python, combining front-end development with a strong foundation in database management, RESTful API architectures, and intelligent automation.

A fast learner and clear communicator with a proven ability to lead development teams, architect robust codebases, and support diverse audiences from technical stakeholders to non-technical users in training and workshop settings from concept to deployment.

WORK EXPERIENCE

Junior AI Data Scientist - Media Challenge Initiative (MCI)

- Co-developed the AI Media Lab platform https://aimedialab.africa, an innovation hub and toolkit equipping journalists and students with AI-powered resources to strengthen fact-based reporting, automate workflows, and combat disinformation across East Africa.
- Engineered core functional modules utilizing Large Language Models (LLMs) and advanced AI APIs to process text data, support automated media verification, and streamline editorial workflows.
- Integrated intelligent features with modern full-stack web architectures to deliver seamless, responsive user experiences tailored for media professionals.

Lead Developer & Student Researcher - Cavendish University Uganda

- Designed and deployed a personal portfolio website using HTML5, CSS3, JavaScript and React/Next.js, focused on minimalist UI and fast load times
- Built a conceptual Uganda Airlines operations dashboard with data visualization components, consuming data via REST APIs
- Utilized Git and GitHub for version control, branching strategies, and collaborative code integration across project work.

Class Coordinator / Team Lead, Faculty of Science and Technology Cavendish University Uganda (CUU)

- Primary liaison between administration and IT students on academic requirements and deadlines
- Led a peer development group on software projects, defining team roles for on-time delivery

- Coordinated resources for technical workshops and orientation sessions for 50+ peers

President - Technology Innovators Students Association (TISA), UICT

- Developed internal guidelines for club operations, member registration, and project management
- Chaired weekly board meetings and general assemblies to align team efforts
- Organized technical workshops (coding bootcamps, UI/UX sessions) and innovation challenges for students
- Acted as point of contact between students and external tech companies for internships and speaking engagements

EDUCATION AND TRAINING

2025 – 2026
Diploma in Data Science Management and Analytics
Uganda Institute of Information and Communication Technology (UICT)

2025 – 2026
Diploma in Computer Science and Information Technology
Cavendish University Uganda

2023 – 2024
National Certificate in Information and Communication Technology
Uganda Institute of Information and Communication Technology (UICT)

2018 – 2022
Uganda Certificate of Education
St. Peter's Senior Secondary School, Naalya

PROFESSIONAL TRAINING & CERTIFICATIONS

- Certificate of Internship - Desis Hub Coding School, Kireka
- Tech-preneur Mentorship Program - Uganda Institute of Information and Communication Technology

MOTHER TONGUE(S)

Luganda

OTHER LANGUAGE(S)

English
Working language of study and professional communication

Skill	Level
Listening / Reading	Excellent
Spoken interaction / production	Excellent
Writing	Excellent

COMMUNICATION SKILLS

Strong written and verbal communication, developed through chairing meetings, leading workshops, and producing technical documentation and user guides for peers and non-technical audiences.

ORGANISATIONAL / MANAGERIAL SKILLS

Team leadership and coordination (President: TISA, Class Coordinator/Team Lead, CUU); event and workshop organization, project and deadline management for groups of 50+ people.

JOB-RELATED SKILLS

Frontend development: HTML5, CSS3, JavaScript, React, Next.js responsive, mobile-friendly UI

Backend & APIs: Node.js, REST API development & consumption, LLM & AI API integrations (Anthropic Claude, OpenAI)

Design: UI/UX prototyping, graphic design & digital asset creation

Database Management and Security: SQL, MySQL, PostgreSQL, bcrypt

Version Control & DevOps: Git, GitHub, CI/CD pipelines, Contabo VPS hosting

IT support: Hardware and software maintenance, ICT management

Data & Analytics: Data visualization, data cleaning, statistical analysis, Python (Pandas, NumPy, Scikit-learn)

DIGITAL SKILLS

Skill	Level
Information processing	Proficient
Communication & collaboration (Git/GitHub, remote teams)	Proficient
Content creation (web dev, design assets, documentation)	Proficient
Problem solving (debugging, technical support)	Proficient
Safety (basic data & account security practices)	Independent user

ADDITIONAL INFORMATION

Projects

- AI Media Lab Platform https://aimedialab.africa
  Co-developed an AI-powered innovation ecosystem utilizing LLMs and modern web infrastructure to support fact-checking and modern journalistic workflows.
- HR-System: full-stack HR platform (Next.js, PostgreSQL) covering onboarding, employee records, leave, attendance, payroll and a self-service portal
  repo: https://github.com/VictoriaMirembe/HR-System
- Pearl-Flight: travel and aviation business website (HTML)
  repo: https://github.com/VictoriaMirembe/Pearl-Flight
- Vansaac Deep Cleans: business website for a cleaning company (JavaScript)
  repo: https://github.com/VictoriaMirembe/Vansaac-Deep-Cleans
- Data Analytics Practicum (UICT) applying statistical models and data cleaning to real-world datasets
